

We live in a relatively small city in CA.
We have very limited radio station selections here.

The consensus in our family is that most of the radio stations in our city are mediocre and of poor quality at best. The exception being the public radio stations which offer NPR as well as other kinds of public broadcasting programs.

Our whole family is very grateful to be able to have the wide variety and high quality selections that XM radio offers us, finally!

We ask that XM radio please be given the opportunity and atmosphere in which it can continue to thrive. Thank you.
